

Beware of Ostriches

"Just because we mine sand, doesn't mean we stick our head in it and we knew what was happening. We encourage our employees not to smoke, but if they do, these days we make sure that they are able to be responsible with their butt litter by supplying No BuTTs personal ashtrays. That way the environment is protected - and just as importantly, so is our corporate profile & reputation." Remo Aguilera, Unimin Corp.

You know what's happening too.

How many cigarette butts have your smokers littered today?
How many people have seen them doing it?

Personal Ashtrays permanently eliminate cigarette butt litter - anywhere your smokers light up. It's as simple as that.

To discuss cigarette butt litter reduction for your business that is sustainable, effective, economical and image-positive, ask us today.

Protect our environment. Protect & enhance your corporate image.
