

Beware of Ostriches

"Just because we mine sand, doesn't mean we stick our head in it. We encourage our employees not to smoke, but if they do, we make sure that they are able to be responsible with their butt litter by supplying No BuTTs personal ashtrays. That way the environment is protected - and just as importantly, so is our corporate profile & reputation."

Mike De Angelo, MineVALUATION

**How many cigarette butts have your employees littered today?
How many people have seen them doing it?**

To discuss a cigarette butt litter reduction program for your business that is sustainable, effective, economical and image-positive, call us today.

Protect our environment. Protect your corporate image.
